

Objective: To compare yields of DAP treated with AVAIL against DAP

Crop: Wheat

Location: Yorkshire

Date: 2012

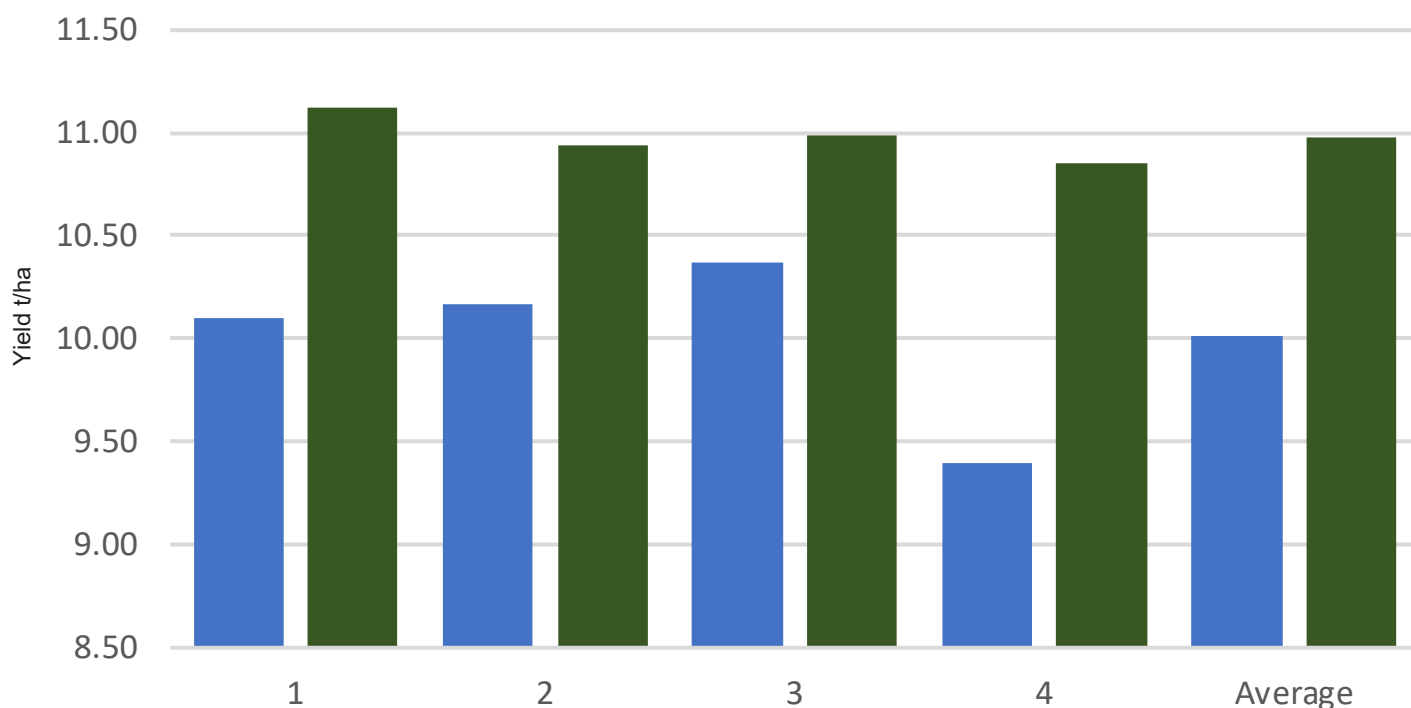

Researcher: Velcourt

Trial code: 2012/01458

Results:

Yield tonnes/ha

Conclusions:

- Across 4 wheat trials, AVAIL averaged 9% additional yield compared to DAP
- In trial after trial, AVAIL has been shown to reduce phosphate fixation and boost potential yield by 10-15%
