

GOULDING ENHANCED – NITROGEN

46% N + NUTRISPHERE-N

NUTRISPHERE-N
Nitrogen Fertilizer Manager

GOULDING ENHANCED – NITROGEN

uses the unique, polymer-based urease and nitrification inhibitor,
NUTRISPHERE-N.

GE-N is a liquid polymer that is coated onto urea fertiliser. This polymer protects the nitrogen by reducing the risk of nitrogen losses from volatilisation and nitrification.

GE-N is suitable for use on cereals and grassland.

GE-N an ideal product for topdressing winter crops and is available with Sulphur if required.

GE-N is protected from losses and so can be spread throughout the season.

For further details please contact your local fertiliser stockist or Gouldings on 021 4911611 / www.gouldings.ie
