

## What is NUTRI-MATCH?

NUTRI-MATCH is an infinite range of prescription compounds fertilisers in which the analyses are formulated to match specific soil and crop nutrient requirements.

## Why use NUTRI-MATCH?

With current data from the Professional Agricultural Analysis Group (PAAG) showing only 9% of soils analysed are at target indices for both P and K, there is a clear need for more targeted nutrition.

### NUTRI-MATCH offers:

- ✓ Unlimited choice of fertiliser analyses
- ✓ Up to 14 essential nutrients
- ✓ Targeted nutrition to match your soil and crops

Selecting the correct nutrients is more important than whether the fertiliser applied is a complex or blended compound.

NUTRI-MATCH prescription fertiliser	Complex compound fertiliser
✓ Infinite range of analyses	⊗ Usually limited to 10-15 analyses
✓ Choice of up to 14 essential nutrients	⊗ Typically contain only 3-4 nutrients
✓ Exact match to soil and crop needs across multiple nutrients	⊗ Very unlikely to give a match to soil and crop nutrients
✓ No over or under supply of nutrient	⊗ Can lead to over or under supply of nutrients

## Are you listening to your soils?

- A soil analysis is essential for providing the factual information required to build a nutrient programme.
- Based on the soil results, a prescription fertiliser can be formulated for your crop in order to optimise your potential yields and maintain soil indices at target levels.
- Interpretation and nutrient prescription should be made by a FACTS Qualified Adviser.
