

ALSO AVAILABLE WITH  
SULPHUR & POTASH

# SUSTAIN

Powered by **AGROTAIN**<sup>®</sup>

THE NEW NAME FOR **K<sup>α</sup>N**

**SUSTAIN** Fertiliser  
TEAGASC Proven

**SUSTAIN** Fertiliser  
High Nitrogen Content

**SUSTAIN** Fertiliser  
Environmentally Stable

*Sustain* is a protected nitrogen fertiliser treated with AGROTAIN stabiliser technology.

*AGROTAIN* reduces both GHG and Ammonia emissions, while ensuring the Nitrogen is available to fuel crop growth all season long.

# SUSTAIN

Powered by **AGROTAIN®**

**MOST PROVEN NITROGEN STABILISER TECHNOLOGY**

At Goulding Fertilisers, our commitment to quality goes beyond results. We demand consistency year after year for proven, real value farmers can count on. **SUSTAIN®**, powered by **AGROTAIN®** is backed by years of research, strict independent testing and diligent quality assurance.

## ACTIVE INGREDIENT

**SUSTAIN®** is powered by **AGROTAIN®**. Every tonne is treated with 660 parts per million (ppm) of active ingredient. This concentration level of **AGROTAIN®** is key to delivering proven results in:

### 1. EMISSIONS REDUCTIONS

Independent Irish research<sup>1</sup> has shown that with an active ingredient level of 660ppm, **SUSTAIN®**:

- reduced direct nitrous oxide GHG emissions by 73% compared to CAN.
- reduced ammonia losses by up to 78.5% compared to urea.

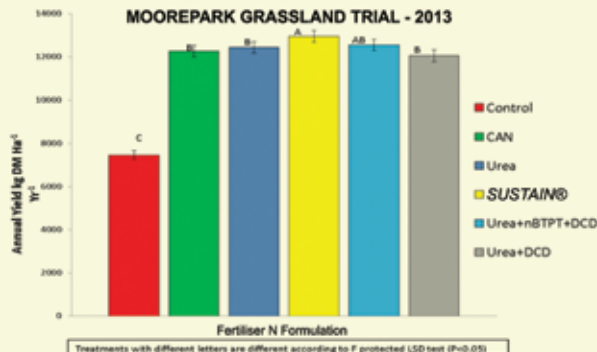

1. Teagasc and the Agri-Food and Bioscience Institute (2013-16)

### 2. YIELD PERFORMANCE

**SUSTAIN** gives performance equal to or better than CAN and Urea.

### 3. SHELF LIFE & STABILITY

**SUSTAIN®** is stable in bags for 12 months, consistently meeting or exceeding the minimum active ingredient levels specified by EC fertiliser regulation.

Treatments with different letters are different according to F protected LSD test (P<0.05)

**SUSTAIN®** delivers consistent results year after year to growers around the world. No other urease inhibitor can make this claim.
