

# RICHLAND®

22.7 : 2.5 : 5 + 3% S

plus magnesium, copper,  
manganese and zinc

15% less N =  
same yield\*

\* Trials at Waterford and Cork

**Lower nitrogen content\***

**Lower carbon footprint\***

**Balanced soil nutrition\***

- Magnesium: improves appetite and nutrient availability
- Copper: increases herd fertility and thrive
- Zinc: improves animal health and enhances plant tillering
- Manganese: high fertility and improves root development
- Sulphur: improves protein content, digestibility and nitrogen efficiency

\* Compared to standard practice 27-2.5-5
